)	

MOTION TO RESCHEDULE CASE MANAGEMENT
CONFERENCE

1. The Case Management Conference is currently scheduled for Friday,
DECEMBER 2,, 2022, @ 10:30 a.m. days from today.
2. I respectfully request that the Court move the Case Management Conference to date
convenient to the court that'll allow both parties to confer and reconstruct a proper and valid
case management conference. Approximately 2 weeks out should suffice.
3. This change is necessary due to;
 - a. Plaintive having his vehicle stolen out of West Covina and simultaneously having his
cell phone stolen.
 - b. Plaintive on her about the same day that his vehicle was stolen fractured a small bone
in his right hand limiting his ability to type and or maneuver through motor body movements.
Patient was subsequently hospitalized and just released as of Wednesday.

c. Additionally, as a result both parties have not had a chance to confer and work up a new case management conference.

d. Plaintive apologizes immensely for tardiness and for lack of communication and ask for the courts mercy in granting this request.

e. Attachment of plaintiff's lab and x-ray results from Kaiser hospital are attached and proof of stolen vehicle report and or insurance report can be provided if necessary.

f. Due to time sensitivity and just noticing this email earlier Wednesday evening, defendants are notified of this notice through electronic filing only.

h. Plaintive thinks Your Honor and the court in advance for understanding and consideration.

I declare under penalty of perjury that the above statements are true and correct.

Respectfully submitted,

A handwritten signature in black ink, appearing to read 'Tommy Navarrette', with a stylized, cursive script.

To see more information about a test result, select the "Details" tab. To compare test results over time, click "Past results" or "Graph of past results."

Minor abnormalities of test results are not unusual and may not be significant. They are subject to the interpretation of your health care practitioner.

Study result

Impression

FINDINGS/IMPRESSION:

There is fracture of the hamate status post reduction and splinting/casting. The splinting/casting material obscures the evaluation of the underlying bones.
